QUESTIONS

Q1 1. Find the bugs, include the missing lines in the following snippet. 10 marks

Q2 6. Buggy Code in underflow operation 10 marks

Q3 11. Create a LL with 5 nodes and display even nodes 1 mark

3/3 answered

Q1 1. Find the bugs, include the missing lines in the following snippet.

10 marks

```
int linearSearch(int arr[], int n, int key) {
    for(int i = 0; i <= n; i++) {
        if(arr[i] == key)
            return i;
    }
    return -1;
}
```

★ Debugging Task: Find and fix the bugs in the code shown above. Write your corrected code in the editor below.

Your Fixed Code

```
#include <stdio.h>
int linearSearch(int arr[], int n, int key)
{
    int i;
    for (i = 0; i < n; i++)
    {
        if (arr[i] == key)
            return i;
    }
    return -1;
}

int main()
{
    int arr[] = {10, 20, 30, 40, 50};
    int key = 30;
    int index = linearSearch(arr, 5, key);
    printf("%d", index);
    return 0;
}
```

Test Input

stdin input (optional)

Output

2

Pending manual review

Submitted

Q1 1. Find the bugs, include the missing lines in the following snippet. 10 marks

Q2 6. Buggy Code in underflow operation 10 marks

Q3 11. Create a LL with 5 nodes and display even nodes 1 mark

3/3 answered

Q2 6. Buggy Code in underflow operation

10 marks

```
int pop() {
    if(top == 0) {
        printf("Underflow");
        return -1;
    }
    return stack[top--];
}
```

★ Debugging Task: Find and fix the bugs in the code shown above. Write your corrected code in the editor below.

Your Fixed Code

```
#include <stdio.h>
int stack[100], top = -1;

int pop() {
    if (top < 0) {
        printf("Underflow");
        return -1;
    }
    return stack[top--];
}

int main() {
    int val;
    scanf("%d", &val);
    stack[++top] = val;
    printf("Popped: %d\n", pop());
    return 0;
}
```

Test Input

stdin input (optional)

Output

Popped: 0

Pending manual review

Q1 1. Find the bugs, include the missing lines in the following snippet. 10 marks

Q2 6. Buggy Code in underflow operation 10 marks

Q3 11. Create a LL with 5 nodes and display even nodes 1 mark

3/3 answered

Q3 11. Create a LL with 5 nodes and display even nodes

1 mark

```
void display(struct Node *head)
{
    while(head != NULL)
    {
        printf("%d ", head->data);
        head = head->next;
    }
}
```

★ Debugging Task: Find and fix the bugs in the code shown above. Write your corrected code in the editor below.

Your Fixed Code

```
#include <stdio.h>
#include <stdlib.h>

struct Node {
    int data;
    struct Node *next;
};

void display(struct Node *head) {
    while (head != NULL) {
        if (head->data % 2 == 0) printf("%d ", head->data);
        head = head->next;
    }
}

int main() {
    struct Node n5 = {50, NULL};
    struct Node n4 = {45, &n5};
    struct Node n3 = {35, &n4};
    struct Node n2 = {25, &n3};
    struct Node n1 = {15, &n2};

    display(n1);
    return 0;
}
```

Test Input

stdin input (optional)

Output

15 25 35
